

Shower Enclosures 2009

Over 40 years of creating shower enclosures means we know every detail counts: engineering strength as well as aesthetic beauty; hand-building only the best products, supplying through only the best retailers. We are proud of our heritage; we are passionate about what we do. The result is quality you can feel, support you can trust and a guarantee of real substance.

To create the shower of your dreams we recommend you seek help and advice; certain products are more appropriate for certain environments than others. Daryl have appointed a nationwide network of Principal Showrooms who are retailers working in partnership with Daryl to offer you a choice of quality displays together with knowledgeable staff in a pleasant, relaxed environment.

Here's the biggest challenge a Daryl® enclosure will ever give you – choosing. First, which range provides the style you want? Next, what shape and size suits your room and which door, if you want one, works best? The following pages explain the options and will show that no matter the particular circumstances of your installation, Daryl will be able to provide a solution.

Ranges

Timeless or contemporary, airy or solid, each range may look different, but they all offer the same engineering excellence that guarantees a lifetime of real-world reliability. Choose a shower system to complement the enclosure and complete the effect.

Shapes

Choosing the right shape can make the most of your space. Quadrants and pentagons optimise the shower space in the corner, whilst rectangles and squares provide flexibility in providing your ideal showering location. Walk-ins give you the ultimate in stylish showering combined with ease of access where space is not at a premium.

Also consider size; our large enclosures are the crowning glory of the bigger bathroom, while more compact units provide high quality in the smallest of spaces.

Shapes and size do not need to be a constraint – let your desire for your very own space be given freedom of expression with our bespoke service. And when there's no room for a separate door or enclosure, you can still have Daryl quality in the shape of our durable and stylish bath screens.

Doors

You can feel the heritage in a Daryl enclosure door – no flimsy 'twang', just a satisfying 'thud'. The range of door configurations let you get in easily, no matter your room layout, but won't let the water out, no matter what you throw at it. Alternatively, if you seek a look and feel where entry and exit are unobstructed then consider the walk-ins.

All product that leaves the factory is hand-built and finished by skilled men and women, dedicated to ensuring the highest standards are maintained down the line.

Integrated Showering

Daryl® showering collection allows you to integrate a showering system within the frame of the enclosure, which brings you a number of benefits – both aesthetic and functional.

You can easily hide away pipework within the enclosure frame and extend your multi-spray showering column to full ceiling height to conceal pipes from above.

Integrating the system within the enclosure also allows you to direct the spray towards the showering area - away from the rest of the room – keeping wet and dry zones separate.

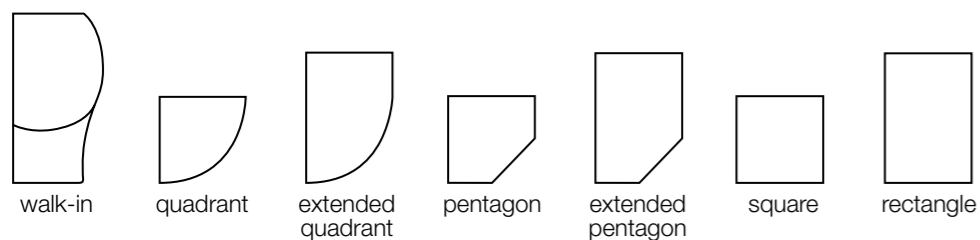

Coated Glass

All our doors, panels and bath screens use toughened safety glass to BS EN 12150. Daryl doors, panels and bath screens (excluding Aroco,) pass through our own state of the art coating machine in controlled factory conditions. Coated glass enables easy of cleaning.

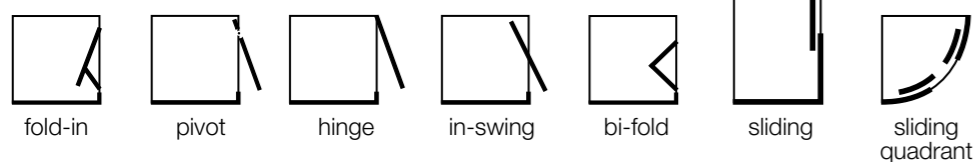

Guarantee

Slam and impact tests ensure structural quality. We use high grade aluminium alloy, anodised in our own factory, to ensure the consistency of finish and performance you demand. This gives us the confidence to offer guarantees of real substance. Please visit daryl-showers.co.uk to view the terms and conditions and to register your guarantee or call us free on 0808 100 1627. The guarantee is only validated upon registration.

Shapes

Doors

Indigo®

Indigo enclosures are both beautiful and functional. The stunning ergonomic design allows an unobtrusive structure and its functionality makes it almost effortless to use. Frameless modern styling combined with unique installation features are the hallmark of the Indigo collection, delivering an outstanding showering performance time and time again.

- Extends the width of an lana door, side panel and enclosure by 18mm

Section 628, Silver frame

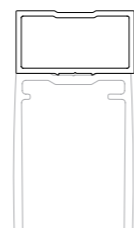

Size	Excl. VAT	Inc. VAT
18mm	£31.49	£36.21

Section 628

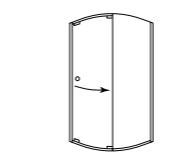

To extend width of lana wall channel

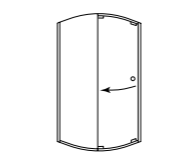

Section 628

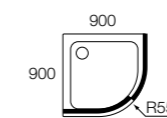

To extend width of lana sliding quadrant and straight slider

900mm left hand door slides left to right

900mm right hand door slides right to left

900mm tray

lana walk-in 1700 x 700mm without end panel (left hand showering area)

lana Walk-In without End Panel 180

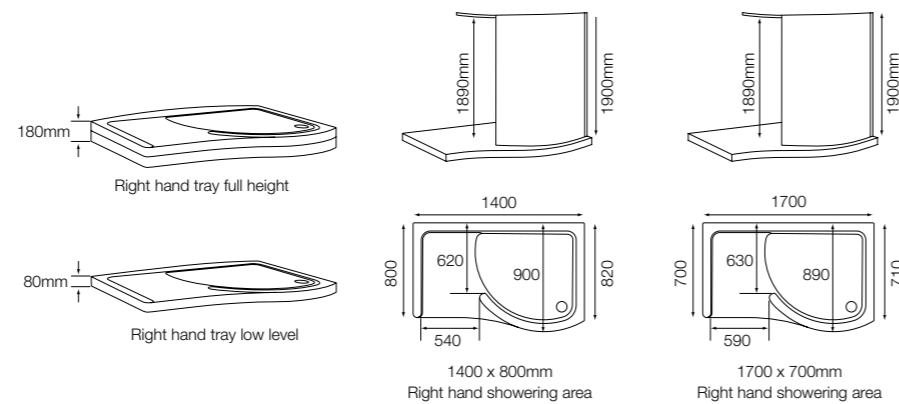

- Available to suit left or right hand showering area
- Frame adjustment to allow for uneven walls
- 5mm thick safety glass
- Coated glass for ease of cleaning
- Suitable for power showers given reasonable use
- Height from top of the tray 1900mm
- Integral full height white tray 180mm with adjustable feet and matching fascia panel or low level white tray 80mm
- Lifetime Guarantee

When choosing a walk-in enclosure, please be aware that spray or mist may extend beyond the length of the glass panel. The amount of spray or mist will depend upon the power of the shower, location of the shower and/or outlets and how the shower is used. We would recommend use of walk-ins with tiled floors. If you are in any doubt, please seek advice before purchase.

- 6mm thick safety glass in-line panel
- Frame adjustments when a 621 in-line panel is combined with a standard 700mm 631 pivot door/671 fold-in door = min 1082mm - max 1148mm

Clear glazing. Silver frame

Size	Excl. VAT	Inc. VAT
400mm	£398.30	£458.05

1147-1200mm min-max frame adjustment when fitted with hinged door 661

1134-1200mm min-max frame adjustment when fitted with pivot 631 or fold-in 671

1551-1617mm min-max frame adjustment when two 621 in-line panels are fitted with a 762/800mm Cyan door

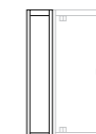

1665-1731mm min-max frame adjustment when two 621 in-line panels are fitted with a 900mm Cyan door

One 621 in-line panel combined with a standard 762/800 Cyan door = 1200mm width

Two 621 in-line panels combined with a standard 762/800 Cyan door = 1600mm width

Two 621 in-line panels combined with a standard 900 Cyan door = 1700mm width

Cyan bespoke hinged enclosure

Cyan[®] Bespoke Service

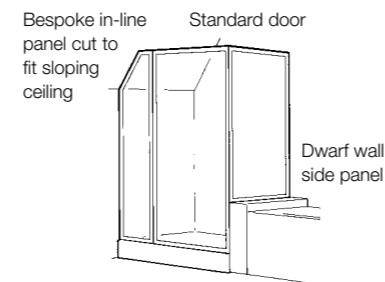

- The Daryl[®] bespoke service specialises in creating shower enclosures, doors and bath screens for difficult or unusual places and spaces.
- The Cyan collection (excluding walk-in and quadrant units) provides the perfect solution for individual choice and flexibility
- Doors and side panels made shorter and/or narrower than standard sizes
- Doors and side panels made up to a maximum height of two metres
- Choice of glazing options: Clear or frosted
- Angled panels for sloping roof applications
- The example below illustrates possible bespoke applications, featuring a standard door with a bespoke side panel, and a bespoke in-line panel that has been cut at an angle to fit a ceiling.

Price guide

Height/width add 35% to nearest standard Cyan price

Angled panels add 60% to nearest standard Cyan price

No surcharge for frosted glass when ordering as part of a bespoke solution

Special Glazing Options Cyan[®] & Arcadia[®]

- Special frosted glazing option available to order on Cyan doors and enclosures (excluding walk-in and quadrant units)
- Clear Victoriana pattern glass is available to order on Arcadia doors, enclosures and pentagons
- To calculate the total price please add the cost per glass panel to the appropriate standard unit price

Cyan - frosted
Arcadia - Clear Victoriana

Cyan Home Measure and Installation Service

Available on all Cyan bespoke products

The two objectives of the home measure are to help you create the shower of your dreams with a realistic appraisal of the installation and to spot any potential pitfalls up front. Our engineers will be looking for out of true walls and varying slopes (including unlevel trays). They will check that the choice and position of any door or panels is suitable in relation to the whole bathroom layout and that the handing of the door and panel is right for the application.

The home measuring service that can only be undertaken after tiling is complete and the tray is installed.

If a Daryl shower system is to be incorporated into your design, please refer to page 138 for technical information and ask your retailer for advice on the suitability of your water system and the ideal location for the column.

If you wish, our engineer will return to install the unit, further ensuring your complete satisfaction.

Please contact our dedicated bespoke department on 0151 606 5000 for further information.

Price guide	Excl. VAT	Inc. VAT
Home measure	£93.62	£107.66
Installation	£178.72	£205.53

This service is currently only available in mainland UK. Daryl will only carry out an installation if we have undertaken the original Home measure.

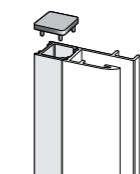

Cyan Filler Profiles

Section 247, 248, 334, 344, 464

Excl. VAT	Inc. VAT
£31.49	£36.21

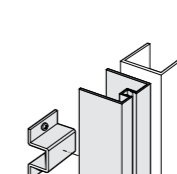

The above units are available in Gold and White, please contact Customer Services on 0151 606 5000 for prices and availability

Section 247

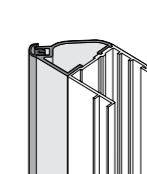

To extend width of Cyan side panels by 18mm (inc. top caps)

Section 334

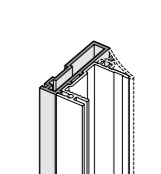

To provide fixing for products at 90° to wall

Section 344

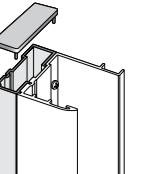

To provide fixing for Cyan doors at 135° to wall

Aroco twin door quadrant 900 x 900mm

Extended trays are handed, please state left or right when ordering

Aroco walk-in without end panel 1400 x 800mm (left hand showering area)

Aroco® Walk-In without End Panel 801

- Available to suit left or right hand showering area (please state when ordering)
- Frame adjustment to allow for uneven walls
- Dedicated shower tray
- Choice of shower tray height 180mm or 90mm
- Height 1830mm (1900mm at point of entry)
- 5mm thick safety glass curved panel
- Suitable for power shower given reasonable use
- Option to install unit direct onto tiled surface without tray, suitable for use in a 'wet bathroom'
- 10 Year Guarantee

When choosing a walk-in enclosure, please be aware that spray or mist may extend beyond the length of the glass panel. The amount of spray or mist will depend upon the power of the shower, location of the shower and/or outlets and how the shower is used. We would recommend use of walk-ins with tiled floors. If you are in any doubt, please seek advice before purchase.

Special glazing options: frosted, clear victoriana - see page 117

Arcadia hinged enclosure 1200 x 800mm (right hinged door)

051 twin square bathscreen (left hand fixing)

Bath Screens - Twin, Triple and Multi-Fold

- Coated glass for ease of cleaning
- Fixed first panel on folding bath screens
- Highly engineered water-tight hinges
- All screens are handed left or right
- Frame adjustment to allow for uneven walls
- 5mm toughened safety glass
- Left or right hand fixing
- Magnetic profiles to secure panels when in folded position on 052, 053 and 054
- Lifetime Guarantee

Power shower compatibility

Wall channels, hinges and seals of all screens are power shower approved assuming that the shower head is positioned for normal use. Spray may however extend beyond the length of the screen, please ask your retailer for guidance.

Bath compatibility

Daryl bath screens are not compatible with baths with integrated soap dishes, stepped fronts, handles, a lip projecting above the bath rim or outward sloping rims.

- The overhead drench shower position is adjustable at point of installation to suit individual height requirement
- Safety features include:
 - Failsafe thermostat
 - Safety stop button
 - Non-return valves
- Lifetime guarantee

Cyan Height Drench or Spray	
Excl. VAT	Inc. VAT
£1353.19	£1556.17

Combination boilers

If you choose to use a Hydra shower system with a combination boiler, the flow rate will be determined by both the mains pressure and the capacity of the boiler. To achieve maximum flow rate with a combination boiler, please ask your retailer or installer for details of compatible boilers.

Water flow and supply requirements

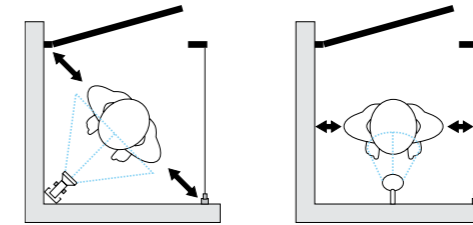

Min flow pressure	1.5 bar
Recommended operating pressure	2 - 4.5 bar
Safety stop	38°C
Temperature range	Cold - 50°C
Max hot water supply temperature	65°C

Flow capacity at 3 bar

Overhead shower - spray	17 l/min
Overhead shower - drench	19 l/min
Hand-held shower	16 l/min
Overhead + hand-held	21 l/min

Elbow room

Hydra Modern showering provides more elbow room, effectively increasing the showering space by standing crosswise inside the enclosure. Ergonomically designed to provide all-over showering for people of all ages and sizes.

Add a Hydra shower system to a 900mm enclosure and enjoy 1200mm elbow room. An 800mm enclosure gives 1080mm.

Traditional showering will give 865mm from a 900mm enclosure. An 800mm enclosure will give 765mm.

Controls

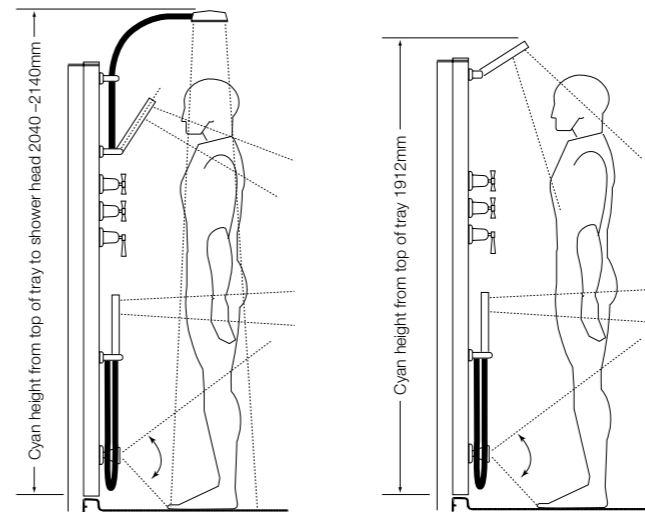

Foot spray

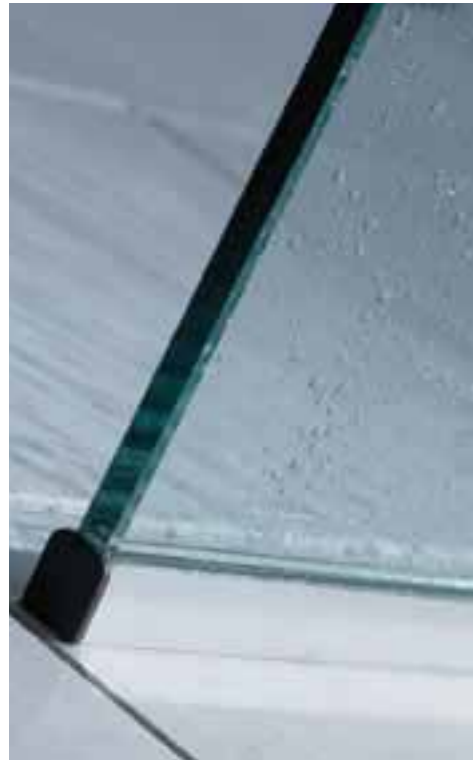

Overhead spray shower

Hand-held shower

Three shower heads which operate individually or as a combination of overhead and hand-held

* If using integrated Hydra Modern with a Cyan or Iana walk-in enclosure please be aware that spray or mist may extend beyond the length of the glass panel, depending upon the power of the shower and how it is used. We would recommend use of walk-ins with tiled floors. If you are in any doubt, please seek advice before purchase

Daryl Care Programme

Using state of the art bespoke machinery combined with the latest technology, all Daryl doors and panels (excluding Aroco) are coated with a glass protector in highly controlled factory conditions. The protector acts as an invisible barrier on the glass to prevent build up of limescale, soap scum, stains and dirt. The factory applied protector will last from months to years depending on use and the hardness of water in your area. It will never crack, peel, discolour or build up. Coated surfaces are kept clean simply by rinsing or wiping with a damp cloth and regular use of Daryl Glass Cleaner.

There are two separate elements to caring for your Daryl shower door, enclosure or bath screen.

- Daryl Glass Cleaner for the regular cleaning of your shower door, enclosure or screen
- Daryl Care Kit comprising of Daryl Glass Treatment and Daryl Glass Protector suitable for use where glass protector has not already been applied or for topping up factory coated protector

	Excl. VAT	Inc. VAT
Daryl Glass Cleaner	£8.93	£10.27
Daryl Care Kit	£26.90	£30.94

Above prices are for retail customers only single product. Minimum quantity for stockist 10 of each.

Daryl® Glass Cleaner

For occasional cleaning of glass treated with Daryl Glass Protector or for more regular maintenance of untreated surfaces, we recommend using Daryl Glass Cleaner. The Cleaner cleans and polishes without smearing or streaking and rejuvenates Daryl Glass Protector.

Daryl Care Kit

Available in one care kit, the treatment and protector are used on new or existing shower installations where protector has not already been applied and for topping up factory coated glass after a reasonable length of time. The treatment must always be used on existing shower installations to prepare for the protector. The treatment is a cleaning material that is applied to the glass to ensure it is in the cleanest condition possible prior to application of the protector. If this process is not undertaken, there is the likelihood of locking in dust, dirt and stains under the protector.

Daryl Glass Protector acts as an invisible barrier on the glass to prevent the build up of lime scale, soap scum, stains and dirt. Applied like a polish, one application will last from months to years depending on use and the hardness of water in your area. It will never crack, peel, discolour or build up. Coated surfaces are kept clean simply by rinsing or wiping with a damp cloth and regular use of Daryl Glass Cleaner.

The Daryl Care Kit includes; one bottle of Daryl Glass Treatment, one bottle of Daryl Glass Protector and 4 cloths, 2 rubber gloves.

Peace of mind guarantee

At Daryl we are confident in the quality and reliability of our products and guarantee them against faulty materials or workmanship, provided that they have been installed, cared for and used in accordance with our instruction.

Daryl® products are backed by a lifetime guarantee.

Aroco® products carry a 10 year parts and 2 year labour guarantee.

The Lifetime Guarantee and Aroco 10 Year Guarantee is valid in the United Kingdom and Republic of Ireland and is available to the original purchasing individual upon registration of the product. For further information please visit daryl-showers.co.uk or call us for terms and conditions and to register your guarantee.
